

Empathy Map

Date	15 March 2024
Team ID	SWTID-2026-1854
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
• “Employee data should be easy to import.” • “I want accurate employee records.” • “Manual data entry takes too much time.”	• “Employee data should be easy to import.” • “I want accurate employee records.” • “Manual data entry takes too much time.”
PERSONA NAME : ServiceNow Employee Data Administrator	

*(Role / User
Type :
ServiceNow
user
managing
employee
data)*

DOES

- “How can I reduce data entry errors?”
- “Can I update employee records easily?”
- “I need all employee information in one place.”

FEELS

- Imports employee data from spreadsheets.
- Updates employee records in ServiceNow.
- Creates reports and checks employee information.
