

Technology Stack

Date	15 Ma2026
Team ID	SWTID-2026-1854
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML, CSS, JavaScript	Used to create a simple, responsive and user-friendly project interface.

2	Backend / Server-Side	ServiceNow Platform	Provides server-side processing, business logic, data management and automation.
3	Database / Data Storage	ServiceNow Database / Employee Test Table	Stores employee records securely and allows easy retrieval and management of employee data.
4	Cloud / Hosting / Deployment	ServiceNow Cloud Platform	Provides cloud-based hosting and allows the application to be accessed through the ServiceNow platform.

5	Version Control & CI/CD	GitHub	Used to store project files, maintain version history and support project collaboration.
6	Third-Party APIs / Other Tools	Import Sets & Transform Maps	Used to import employee data from spreadsheets and transform it into records in the Employee Test table.
