Project Title	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	The primary objective is to simplify employee data management by using ServiceNow Import Sets and Transform Maps, enabling faster and more accurate employee data import and management.
Scope	The project covers importing employee data from spreadsheets, managing employee records, creating reports, and displaying employee information through an analytics dashboard in ServiceNow.
Problem Statement	
Description	Manual employee data entry and management can be time-consuming and may result in data errors, making it difficult to maintain accurate and updated employee records.

Impact	Solving these issues will improve data accuracy, reduce manual effort, save time, and make employee information easier to manage and monitor.
Proposed Solution	
Approach	Using ServiceNow Import Sets and Transform Maps to import employee data from spreadsheets into the Employee Test table, followed by reporting and dashboard-based monitoring.
Key Features	• Import employee data from spreadsheets using Import Sets and Transform Maps. • Create and manage employee records in the Employee Test table. • Generate employee reports based on department, location, and employee details. • Provide an analytics dashboard for easy monitoring of employee information.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Computer/Laptop for ServiceNow development and project work	Intel Core i3 or above
Memory	RAM required for browser, ServiceNow and development tools	8 GB RAM
Storage	Storage for project files, spreadsheets and documentation	256 GB SSD

Software		
Frameworks	Platform used for application development and configuration	ServiceNow Platform
Libraries	Built-in tools used for data import and management	Import Sets, Transform Maps
Development Environment	Environment used to develop and configure the application	ServiceNow Instance
Data		
Employee Data	Source, size, format	Employee spreadsheet, 10 records, XLSX/CSV
ServiceNow Data	Imported and stored employee records	Employee Test table
Reports & Dashboard Data	Data used for analytics and visualization	Department, location and employee details
