Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the project that sends or receives data, such as a ServiceNow Administrator/User.
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data, such as preparing employee data, importing employee data, and generating reports.
Rectangle (solid fill, no number)	Data Store	A place where data is stored for later use, such as the Employee Spreadsheet, Employee Test Table, and Reports & Dashboard.
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, such as employee data, imported records, and report details.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
