

Coding & Solution

Date	30 September 2026
Team ID	SWTID-2026-1854
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/Anandhavalli12/Import-Data-using-Transform-Maps-Spreadsheet-1
Programming Language(s)	ServiceNow scripting / Configuration; HTML, CSS, JavaScript for project documentation
Framework(s) Used	ServiceNow Platform

Key Features Implemented	1. Employee data import using Import Sets and Transform Maps. 2. Employee Test table for storing employee records. 3. Employee reports based on department, location and employee details. 4. Employee Analytics Dashboard for viewing employee information and reports.
Pending / Incomplete Features	No major features are pending. The implemented project requirements have been completed.
Setup / Run Instructions	1. Open the ServiceNow instance. 2. Open the Employee Test table. 3. Prepare the employee spreadsheet. 4. Import the spreadsheet using Import Sets. 5. Run the Transform Map to create/update Employee Test records. 6. Open the Reports and Employee Analytics Dashboard to view the employee data and analytics.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The project is implemented using the ServiceNow platform. Employee data is imported using Import Sets and Transform Maps into the Employee Test table. Reports and an Employee Analytics Dashboard are created to view and monitor employee information. The project components are organized properly, tested for functionality, and the project files are maintained in GitHub.
