

Performance Testing

Date	30 September 2026
Team ID	SWTID-2026-1854
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	ServiceNow Platform
Type of Testing	Load Testing / Functional Performance Testing
Target Module / API	Employee Data Import using Import Set and Transform Map
Test Environment	ServiceNow Cloud Instance
Test Date	26-9-2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Import employee spreadsheet using Import Set	1	30	Employee data should be imported successfully into the Import Set.
2	Transform imported employee data using Transform Map	1	30	Employee records should be created correctly in the Employee Test table.

3	Verify employee records and reports	1	30	Imported employee records should be displayed correctly and reports should show the expected data.
4	Verify Employee Analytics Dashboard	1	30	Dashboard should load successfully and display the employee reports and analytics correctly.

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Not measured	Not Tested	No dedicated performance testing tool was used.
2	Response Time (Max)	< 5 seconds	Not measured	Not Tested	No maximum response-time measurement was recorded.
3	Throughput (Req/sec)	Not specified	Not measured	Not Tested	Request throughput was not measured for this ServiceNow project.
4	Error Rate	< 1%	Not measured	Not Tested	No load-test error rate was recorded.
5	CPU Utilization	< 80%	Not measured	Not Tested	Server CPU utilization was not measured separately.
6	Memory Utilization	< 80%	Not measured	Not Tested	Server memory utilization was not measured separately.

Step 4: Observations & Analysis

The employee data import process using Import Sets and Transform Maps was verified successfully. Employee records were checked in the Employee Test table after transformation. Reports and the Employee Analytics Dashboard were also verified to ensure that the imported employee information was displayed correctly. No critical functional errors were observed during testing. Dedicated performance metrics such as response time, throughput, CPU utilization and memory utilization were not measured.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

Not Applicable – No dedicated performance testing tool was used for this project.
